

# CD Review

It is my pleasure to review the wonderful CD based presentation by Dr. Krishna Garg and Dr. Gayatri Rath. The CD presentation is based on well known BD Chaurasia's Human Anatomy (5th Edition). The remarkable feature of the CD presentation is its user friendly approach. It is in the form of question and answers. It gives the opportunity for self analysis. The language is very simple specially for under and post graduate students. The answers are given in very selective and precise manners. The other remarkable feature is video based study for Human Osteology which gives simplified details of Human bones and Joints. In the present era of electronics and internet, the CD presentation is very successful attempt by Dr. Krishna Garg and Dr. Gayatri Rath to help undergraduate and postgraduate students of Anatomy. We wish grand success of this presentation.
